

VESDA VLQ: Very Early Warning Fire Detection (VEWFD)

VESDA very early warning smoke detection solutions provide the earliest possible warning of an impending fire hazard. VESDA buys time to investigate an alarm and initiate an appropriate response to prevent injury, property damage or business disruption. As the No. 1 ASD brand specified by fire professionals around the world, VESDA is synonymous with reliable, high performance fire detection.

The VESDA VLQ combines these fundamental basics of Xtralis ASD for small area applications supporting core business operations.

- Very Early Warning for small areas up to 100m² (1,000 sq.ft),
- Up to four (4) Class-A holes
- Mitigates the effects of dilution due to high airflow
- Minimizes downtime and service interruptions
- Allows more time to respond to remote sites
- Minimizes damage to equipment from the corrosive properties of smoke
